CITY ENGINEER

October 15, 2009

Honorable Mark D. Boughton, Mayor
Common Council
City of Danbury
155 Deer Hill Avenue
Danbury, CT 06810

Dear Mayor Boughton and Common Council Members:

Sanitary Sewer Extension (Assessment Method)
Boulevard Drive
Mail Re-Survey
Project No. 04-03

The Common Council had received a request from the property owners in the Boulevard Drive area to review the possibility for the extension of sanitary sewer. After the initial public hearing for the project, the Common Council voted to proceed with the final design for this project. The design of the project offered some challenges, particularly, the need and location for a pump station. We re-examined the exposure of the pump station in the neighborhood and are proposing a less obtrusive structure to serve the neighborhood.

As part of that design, we have gotten a revised and updated "Opinion of Probable Costs" which reflects today's market prices. We resurveyed the property owners to see how much interest there still is in this proposal based on the current costs and economy.

The mail re-survey soliciting input from those property owners who would benefit from the extension of the City's sanitary sewer system in Boulevard Drive has been completed.

The results of this survey were compiled on October 8, 2009 with the following results:

Yes	**3 (10.7 %)**
No	**22 (78.6 %)**
No response	**3 (10.7 %)**
	28 Total number of lots in survey

A color-coded map showing how the owners of the lots that would be served voted has been prepared. The map is available in my office for review.

Hopefully, this information will assist you in your deliberations as to whether this sanitary sewer construction project should continue to go forward.

If you have any questions, please feel free to contact me.

Very truly yours,

Farid L. Khouri, P.E.
City Engineer

C: Antonio Iadarola, P.E.
