Dear Members of the Common Council,

We believe that it is critical to preserve our open and our passive recreational space for generations of Danburians to come.

A brief analysis of land records of city owned open space like Tarrywile Park, Bear Mountain, Dryska Property, and Richter Park indicate that many of these recreational properties have minimal protection from possible future conversion to other uses.

We are respectfully requesting an ad-hoc committee be appointed to investigate strategies to ensure that our parkland is preserved as open space in perpetuity. A higher level of protection of these city owned lands is critical to preserving our passive recreational land as we move into the 21st century.

Sincerely,

Mark D. Boughton
Mayor
