MAYOR
Honorable Mark D. Boughton

PUBLIC WORKS DIRECTOR
Antonio Iadarola, P.E.

September 24, 2012

Honorable Mayor Mark D. Boughton
Honorable Members of the Danbury City Council
155 Deer Hill Avenue
Danbury, CT 06810

RE: Monthly report for August 2012

Dear Mayor Boughton and Members of the City Council:

I am pleased to present the Public Works Department report for the month of August.

Several meetings were held internally and with the leaders of the Dignity Vietnam Wall Committee. The traveling wall is expected to be visiting Danbury at the end of September. Public Works will help with selecting an appropriate location in Danbury and any other support that we can provide. We are very excited that Danbury has been selected to host the wall to honor the Vietnam veterans who served.

Several division heads in Public Works are pushing hard to wrap-up any new projects before the summer comes to an end. We will continue to pave into the fall and complete several road repairs.

Should you have any questions regarding any of the separately submitted division reports please call me at 203-797-4537.

Construction Services Report submitted by Thomas Hughes III, Superintendent:

B.I. Access Project: Project closed out Broad Band Traffic Control System up and running and accepted by City Traffic Engineer.

White Street ARRA Project: With the remaining balance of our ARRA funding ConnDot has supported a formal request from the City of Danbury to install crosswalks and pedestrian signals on White Street. We are in the process of getting approval for this additional work from ConnDot. Once ConnDot approves the additional work, a change order will be executed to incorporate this additional work into the contract.

Tarrywile Park: We have the budgetary number to replace the mansion roof and gutters. We will be proceeding to schedule this work using our City Bid List. LOCIP has approved the grant for the roof project. We will also be installing three new period doors again using our in house resources City Bid List.

Head Start: Banton Construction has mobilized to the site. The building foundation has been completed. The structural fill has been placed and compacted. The contractor has completed the structural piers. The in slab under ground plumbing and electrical conduit installation is in progress. Structural steel has been ordered and is under fabrication. The project schedule is on track at this point.

DHS ADA Compliance: Completed awaiting letter from the state BSF stating that the City of Danbury DHS is now in compliance.

Middle River Road Bridge: By using our in-house resources for materials, contracting and construction administration will reflect in a significant savings to the City. The construction is at approximately 98% complete. The box culvert and structure wing walls and road construction was completed in 89 days the road opened on June 15th. The contractor has completed rebuilding the stone wall along the westerly side of Middle River Road adjacent to Richter Park. We will be installing two Type II metal beam anchors, which have been ordered and the project will be complete.

DHS Window Replacement: The window & door contractor, Arrow Glass, is at 100 % complete. The abatement contractor Oscar's Abatement has completed the demolition and abatement finished on schedule and within budget. This has been a fast paced project administered by the Construction Services Division. We have completed the punch list for D,F,E & A buildings. The class room shades have been installed in as per the original contract we have ordered shades for C wing. The shades will be completed shortly and will be installed after hours. Both Oscar's Abatement has completed there punch list items. Arrow Glass has completed 95% of their punch list items and is continuing with some additional work performed after hours. Arrow Glass's additional work is covered in the original Honey Well contract and will be at no additional cost to the City of Danbury.

Spring Street Curb & Sidewalk: EDO Construction has completed the project we are now in the closeout phase. This project was administered by Construction Services and designed in-house by the Engineering Division, bringing a significant savings to the City and its taxpayers and again reducing our expenditures on outside consultants.

Hospital & Locust Avenue Drainage: Construction Service has begun to install a drainage system for the Highway Division. This work is being performed in house through the use of our City Bid list.

Should you have any question regarding this report, please do not hesitate to call.

Engineering report submitted by Farid L. Khouri, P.E., City Engineer:

The following assessment projects are the only projects pending on the list based on residents' petitions:

1. Johnson Drive and Pembroke Terrace Sanitary Sewer Extension: Referred to an Ad Hoc committee at the City Council meeting.
2. Butternut Lane, Bayberry Lane and Boxwood Lane Sanitary Sewer Extension: Working on preliminary design and cost estimate.
3. Hawley Road Extension Sanitary Sewer Extension: Working on preliminary design and cost estimate.

Long Ridge Road Bridge: Currently working on in-house design of the bridge and working with Corporation Counsel on securing easement.

East Franklin Street Bridge: The City started the design to relocate the existing sewer in the brook with an above-ground pump station. Also, we will address the scour problem that exists in the abutment walls of the bridge during the sanitary sewer relocation.

Traffic engineer and his technicians are reviewing various land-use development plans; handling of public complaints and routine repair and maintenance of traffic control signal devices and pavement markings.

Staff engineers are reviewing various site plans, water and sewer applications, special exception applications, and subdivision applications for various land-use approvals of on-going development projects throughout the City. Field inspection of sanitary sewer, water mains and new roads are performed regularly on various developments. Review various drainage problems, including site visits, analysis and design.

Survey crew verifies various rights of way, prepares surveys and easements for in-house design of City projects and assists other divisions in locating utilities in the field.

Should you have any questions regarding this report or any other issues related to your Engineering Division, please do not hesitate to contact me at (203) 797-4641.

Highway Division report submitted by Duke Hart, Superintendent of Public Services:

The month of August was, once again, a very busy month for the Highway Division. The construction crews were involved in basin repairs on seven (7) City roads, which include Douglas Drive, Westville Avenue, Elmcrest Drive, Highview Circle, Roberts Avenue, Pleasant Drive and Autumn Drive. New drainage was installed on Douglas Drive and Pleasant Drive in preparation for paving. The in-house paving crew prepped and paved Indian Spring Road, Ventura Avenue Elmcrest Drive, and the parking lots at King Street School, Morris Street School and King Street Firehouse.

A crew is out on a daily basis patching potholes and repairing aprons and curbs. The sign crew installed four (4) new signs in addition to repairs at numerous locations due to accidents or vandalism. The garbage truck is out daily emptying trash and picking up litter and illegal dumping when necessary. The recycling truck is still a popular destination for the residents.

Should you have any questions regarding this report, please feel free to contact me at 203-797-4605.

Parks Maintenance submitted by Duke Hart, Superintendent of Public Services:

The month of August is always very busy for the Parks Maintenance Division. The beaches and spray-parks are a very popular destination for the children and residents. Crews are out daily to be sure they are ready for the day's activities.

The crews are working very hard maintaining all of the fields for the numerous sporting programs throughout the City. The Parks Division ensures that all of these organizations have great field to play on day after day.

Each week the Green is cleaned and prepared on Monday's and Friday's for City Center's weekend events. Mowing at the city schools and the inner-city lawns continues to be on schedule.

Should you have any questions regarding this report, please feel free to contact me at 203-796-1558.

Forestry Division report submitted by Mark Miller, Foreman, Forestry Department:

The Forestry Division performed pruning, cut-backs, hanger removal and take downs at the following locations: Hayestown Avenue School, King Street School, Park Avenue School, Danbury, High School, Great Plain School, Pembroke School, South Street School, Beaver Brook Administration Building, Park Avenue, Deer Hill Avenue, Staley Rough Road, Southern Boulevard, Great Plain Road, Cedar Drive, Driftway Point Road, West Lake Shore Drive, Coal Pit Road, Miry Brook Road, Foster Street.

The crew responded to tree calls at the following locations: Aunt Hack Road, Valley Road, Joe's Hill Road, Saw Mill Road, Barnum Road and Ohehyahtah Place.

The crew also performed cutbacks at Harwood Drive and Elm Crest road in preparation for the Highway Division's paving project.

Should you have any questions regarding this report, please feel free to contact me at 203-797-4609.

Public Buildings report submitted by Rick Palanzo, Superintendent of Public Buildings:

EECBG Grant: All proposed projects under this grant are now complete. The grant is being closed out with the required reports to the DOE.

City Hall: We will be replacing the seating in the City Council Chambers. The current seating has been in use since the building opened in the mid 1960's. I have met with the vendor holding the State of Ct contract for this type of seating and we will be working through the current requirements for seating and will obtain some samples for review prior to purchase. A time frame for completion is not available at this time.

We have new drinking fountains in City hall which replaced the old non-compliant models. These new fountains have bubblers, and fill water bottles as well, for a greener Danbury City Hall. The drinking fountains have been well received and are in use.

Farrington Park – Westside Open Space: The chow house at the Farrington Park is being made ready for a new tenant (rental). The Public Buildings staff work has been completed and we are awaiting the painting and floor refinishing. This should be completed before the end of October.

Danbury Public Schools: The window replacement portion of this project began in June. The heating (non-window) portion of this project is 100% complete. The boiler rooms have been painted and look good.

Yankee Gas and the City have brought natural gas to Mill Ridge Intermediate and Mill Ridge Primary schools. The gas line has been installed and Yankee gas plans energizing the new gas line by mid September. The schools will be able to take advantage of this low cost heating fuel this year.

The Alternative School on Locust Avenue is currently undergoing a roof and gutter replacement that includes the cornice. The project was scheduled to be completed by the end of August, but a manufacturing delay of the replacement cornice will extend the project by several weeks. The roof is tight and the leaders and gutters are functioning as well as anticipated. The decorative cornice, which is being manufactured in Georgia, is behind schedule. The manufacturer is promising delivery in September and October. The cornice is a required decoration and does not affect the workings of the rain gutters. The scope of work for this project has been expanded to include the lower level windows. Funds have been identified and transferred to permit this project to proceed. The windows will be bid in September and awarded in October.

The Pembroke School has received a new 20 year guaranteed roof which was manufactured and installed by the Garland Company. The roof proper was completed before school began. Finishing touches (metal and panel work) will continue through September but will not interfere with the education process.

Old Library: The elevator at the Old Library is out of service pending replacement of the main lift piston. The old piston removal and replacement will require three different contractors to perform the necessary work before the elevator company can install a new piston. The funding for this repair is through the Local Capital Improvement program. When this project is approved by the State of Ct we will proceed with the repair/replacement.

Tank Replacement Project: Fire HQ, Airport, City Hall: The DEEP has required that several underground tanks at these locations be replaced with compliant models. TRC, our consulting engineers, designed a compliant project for the Fire HQ, City Hall and the Airport. The underground tanks at the FD and Airport will be removed and replaced with above ground tanks. This work has begun and should be completed in September.

Requests for Maintenance Service: Attached please find a new format for the statistical report of repairs and maintenance work that the Public Buildings Mechanics engaged in during the month of August 2012. This new report has been streamlined to report only on the work requests that the Public Buildings staff completed for this month. This new format is easier to read and understand presenting practical information.

In the month of August we received 199 new work requests and completed 218 work requests. In reviewing this report, you will find the repair time that was expended in major work categories, (current month versus previous month). Also listed is the total number of work order hours completed, (current month versus the previous month).

Public Building mechanics were engaged in Plumbing repairs with a total of 394.50 man-hours dedicated to this service. The next largest area of concentration was in Electrical repair work, utilizing 256.50 man-hours of labor. General Maintenance work came in as the third highest category with 68.00 man-hours.

Should you have any questions regarding this report, please do not hesitate to contact me at 203-797-4584. I am happy to discuss any portion of this report with you.

Public Utilities report submitted by David Day, Superintendent of Public Utilities:

Enclosed is the monthly report to the Common Council for activities that took place in August 2012. Also attached is the Public Utilities Vehicle Maintenance Report.

As of September 17, 2012 there are 97 hydrants out of service. Repairs to hydrants are continuing. I will be happy to review the information with you.

Sincerely,

Antonio Iadarola, P.E.

Antonio Iadarola, P.E.
Director of Public Works
