Danbury, CT 06810

RE: Satellite Dish Devices Regulation

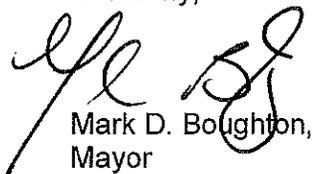

Dear Council Members

As our City continues to implement certain responsible legislation that is reasonable, appropriate and sensible to work toward the betterment of our resident and citizens' lives, I ask that you appoint an ad hoc committee to review regulation of the placement of satellite dishes on structures within our City. An ordinance is under development and is soon to be completed.

The concern centers around the excessive and unbridled proliferation of such devices without proper recognition of structural, safety and aesthetic integrity, as well as the recognition that potential over-occupancy of residential property continues to be a major safety issue in Danbury. As to the latter issue, we have some processes pending that will seek to address that specific concern also.

In the meantime, and pending the submission of the draft ordinance to the committee that will be examining the satellite dish regulation issue, kindly submit this request to an ad hoc for review and action.

Sincerely,

Mark D. Boughton,
Mayor
