Re: Grandview Drive Addresses

This is a request to place the renumbering of street addresses for Grandview Drive on the January Common Council agenda and to refer the matter to an ad hoc committee for expeditious action.

Recently, several new lots have been created on Grandview Drive. Upon investigation, it was found that the numbering sequence for the street was considerably out of order. Our major concern (as it has been under similar circumstances with other streets in the City) is with the confusion this may cause in emergency situations.

We have prepared a proposed renumbering of the street which will result in a uniform numbering sequence. However, as you are aware from previous situations of this kind, a renumbering places a degree of inconvenience on residents who must then notify all those who regularly use their existing street address. We have already received one complaint from a resident.

Given the scope of this issue (thirty-one lots will be affected), we felt that this is a matter that Common Council, rather than staff, should address, allowing affected residents the opportunity to comment on proposed changes.

We appreciate your cooperation on this matter.

c: Jean Natale, City Clerk
