Danbury, CT 06810

RE: CT DOT Project No. 34-313, I-84 Interchange 6 / Route 37 Improvements
Test Pit / Preliminary Engineering Agreement

Dear Mayor Boughton and Common Council Members:

The Public Utilities Department has been directed by the Connecticut Department of Transportation (CT DOT) to perform utility test pit work to confirm water main locations for the above referenced DOT interstate project.

All costs associated with performing the test pit work will be reimbursed by the State to the City of Danbury. All costs incurred due to any required engineering redesign of City water main facilities, as directed by the DOT, due to conflict with the water main facilities and the proposed DOT interstate project, will also be reimbursed by the State.

The CT DOT is preparing a formal test pit / preliminary engineering agreement for delivery to the City on April 6, 2009. We request the Common Council's approval of the execution of this agreement with the understanding that such approval would be conditional upon the receipt of an acceptable document that confirms and conforms to the contents of this letter.

The Common Council's approval of this request will help expedite completion of the required test pit work.

If you have any questions, please let me know.

Sincerely,

David M. Day, P.E.
Superintendent

C: Laszlo L. Pinter, Esq.
Antonio Iadarola, P.E.
Farid L. Khouri, P.E.
