To Whom It May Concern:

This is a petition to stop the Boulevard Drive sewer installation project. Relevant information about the project was not disclosed to the Boulevard Drive homeowners during the initial City of Danbury Common Council meeting or at the time the homeowners voted in favor of the project; specifically, the homeowners were not apprised that the project would require the installation of an above-ground building (enclosing a pumping station) measuring 11 feet by 16 feet on the front lawn of 103 Boulevard Drive.

The installation of the pumping station building will create an eyesore that will negatively affect the market values of all properties within its sight lines, and will commercialize the Boulevard Place area. Therefore, the undersigned Boulevard Drive homeowners hereby vote in favor of stopping the Boulevard Drive sewer installation project.

Respectfully yours,

John DASILVA
