RE: West Side Sewer Interceptor – Phase I Easements

Dear Mayor Boughton and Common Council Members:

Enclosed please find copies of the "Easement Plan for the West Side Sanitary Sewer Project" as revised September 25, 2006. We request that you authorize the Corporation Counsel's office to negotiate and take the necessary steps to acquire the 30' wide temporary construction easements from Danbury Acquisition Corporation as shown on this plan. The temporary construction easements are needed in order to maintain traffic to Danbury Acquisition Corporation during construction of the sanitary sewer across their property.

Also enclosed are copies of a map showing the proposed utility easement to be granted to the City of Danbury over the land of Danbury Acquisition Corporation as dated October 31, 2006. We request that you authorize the Corporation Counsel's office to negotiate and take the necessary steps to acquire the proposed water utility easements and to acquire an existing 8 inch privately owned water main with associated appurtenances from the Danbury Acquisition Corporation. Acquisition of the existing private 8 inch water line and proposed utility easements are necessary to provide the proposed West Side Sewer Pump Station with water service.

If you have any questions, please give me a call.

Very truly yours,

David M. Day, P.E.
Superintendent of Public Utilities

Enclosure
